

THE ROUNDS

One Stop Waste Solutions

TWENTY YEARS OF GETTING WASTE RIGHT IN THE NORTH EAST

One Stop Waste opened in 2006 as a small local provider. Two decades on it serves organisations across the North East — hotels, manufacturing, retail, construction and oilfield services — with the aim it started with: waste handled simply, compliantly and properly.

Plenty has changed since. Recycling rates were low and compliance was a maze. Clients now achieve up to 100% landfill diversion and more thorough staff training and better segregation, backed by ISO 9001, 14001 and 45001 certification and digital reporting.

The next twenty years mean the same work done better: low emission operations, expanded training and advisory services, net zero planning, and helping businesses design waste out at source rather than manage it at the end.

2006 Year One, Aberdeen	3 ISO Standards Held	100+ Trusted Clients	UPTO 100% Landfill Diversion

NEW WEBSITE

If you've visited our website recently, you may have noticed things look a little different. The new site has been a while in the making, and we're really pleased with how it's come together.

It's been designed to be much easier to find your way around. Every service now has its own page, so whether you're after a regular collection or something more specialist, the details are right there.

You'll also find case studies from some of the local businesses we work with, sharing the difference the right waste setup has made for them, alongside our latest news and practical guides on topics like Duty of Care and the upcoming Scottish landfill ban.

WHERE WE WILL BE

FIND US AT THE SAFETY EXPO!

We're excited to be exhibiting at The Workforce Wellbeing & Safety Expo at P&J Live on 29 October. The team will be there throughout the day to chat about anything from training to compliance, so if there's something you've been meaning to ask, come and find us. We'd love to see you there.

DATES
29th October 2026

ONE STOP WASTE SPONSORS THE CLIMATE ACTION AWARD

This year, One Stop Waste was proud to be category sponsor for the Climate Action Award at the Aberdeen City and Shire Thistle Awards. The awards celebrate excellence across tourism, hospitality and events in the North East, from family-run businesses to major attractions.

We're delighted to congratulate the winner: Birks Pond, Castle Fraser, National Trust for Scotland.

Castle Fraser is one of the few places in Scotland where the rare northern damselfly, an endangered species, can still be found. Birks Pond is a new wetland designed with the British Dragonfly Society to help it thrive. Protecting the environment is at the heart of what we do, helping North East businesses reduce waste, recycle more and keep material out of landfill. It was a privilege to recognise a project protecting nature and heritage in our own region.

A CASE STUDY

THE CHESTER HOTEL

A busy hotel produces more waste than most people realise. Kitchens, bars, events, guest rooms. General waste, mixed recycling, food waste, glass, compostables, and the occasional pile of old furniture or paint tins after a refurbishment. Six or seven streams, all needing to be segregated correctly, all needing paperwork that stands up if anyone asks.

For a hotel, none of that is the job. The job is looking after guests. When The Chester Hotel opened twelve years ago, they wanted waste service to be reliable, sustainable, compliant and that simply happened in the background. We have worked with their teams ever since: staff training, clear visual guidance where it is needed, and simple segregation rules people actually follow.

Twelve years on, collections arrive when they should, extra lifts get arranged quickly, and the monthly reports mean Duty of Care is never a scramble. The shared goal has not changed since day one, 100% landfill diversion.

BOOK A FREE WASTE AUDIT

We'll walk your site, look at what you're throwing away and where it's going, and tell you what could be done better. No charge, no obligation.
